DANIEL OGUNLOLU

You know, I've met couples of awesome personalities this year via what I have passion for.

As a monitoring spirit, I've been monitoring this genius in my mind not until I put in for one of his online classes and I was like wawwu!

From there, I chatted him up privately to discuss John 4:23-24. I can never forget that day...smiles

Interestingly, little did I know that we'll be what we are today. Daniel has been good and awesome. I just wonder on how he came about with robots and other relevant things in his field.

Daniel, I pray for more vistas and heights, revelation, innovations, inventions in Jesus name.

Discovery House wishes you Happy birthday Daniel
